tem = DF["source"].astype(str) + " " + DF["text"] + " " + DF["title"]
```

In [124…
```
tem[1]
```

Out[124…
```
'5 For months, President Donald Trump has suggested his personal relationship
with Chinas Xi Jinping will be what unlocks the worlds most consequential tra
de dispute.\r\nYet he couldnt get Xi on the telep… [+6200 chars] Why Trump ha
s struggled to get Xi on the phone to talk trade | CNN Politics'
```

In [125…
```
x= DF["source"].astype(str) + " " + DF["text"] + " " + DF["title"]
y = DF.label
```

Tokenization

In [126…
```
from nltk import TweetTokenizer
TT = TweetTokenizer()
```

In [127…
```
x = x.apply(TT.tokenize)
```

Removing StopWords

In [128…
```
import nltk
from nltk.corpus import stopwords
nltk.download("stopwords")
SW = stopwords.words("english")
```

```
[nltk_data] Downloading package stopwords to /root/nltk_data...
[nltk_data]   Package stopwords is already up-to-date!
```

In [129…
```
x = x.apply(lambda line : [ i.lower() for i in line if i.lower() not in SW])
```

Stemming OR Lemmatizaton : Here we go with Lemmatizaton

In [130…
```
from nltk.stem import WordNetLemmatizer
nltk.download("wordnet")
WNL = WordNetLemmatizer()
```

```
[nltk_data] Downloading package wordnet to /root/nltk_data...
[nltk_data]   Package wordnet is already up-to-date!
```

In [131…
```
x = x.apply(lambda line : [WNL.lemmatize(i) for i in line])
```

Rejoin

In [132…
```
x = x.apply(lambda line : " ".join(line))
```

Ngram & Vectorization

In [133…
```
from sklearn.feature_extraction.text import TfidfVectorizer
vec = TfidfVectorizer(ngram_range= (1,3))
```

In [134…
```
x= vec.fit_transform(x)
```

Split into Training and Testing Sets

In [135…
```
from sklearn.model_selection import train_test_split
```

In [136…
```
x_train , x_test , y_train, y_test  = train_test_split(x,y,test_size = 0.2,ran
```

Model Creation

In [137…
```
from sklearn.neighbors import KNeighborsClassifier
knn = KNeighborsClassifier()
```

In [138…
```
knn.fit(x_train,y_train)
```

Out[138…
```
▾ KNeighborsClassifier
KNeighborsClassifier()
```

In [139…

```
y_pred = knn.predict(x_test)
```

Checking Perfomance Score

In [140…

```
from sklearn.metrics import classification_report
print(classification_report(y_pred,y_test))
```

```
              precision    recall  f1-score   support

           0       0.71      0.80      0.75      6031
           1       0.87      0.80      0.83     10123

    accuracy                           0.80     16154
   macro avg       0.79      0.80      0.79     16154
weighted avg       0.81      0.80      0.80     16154
```

now we got 66% accuracy on this model
